RE: COG * Houma 1 * **2RP-4417** * DOR: 9/27/17

Greetings all,

This proposal for remediation of the above referenced release is approved with the following:

- In the event proposed excavation depths are not achieved, contact the OCD District 2 office to discuss an alternative method.
- OCD discourages, and will typically not approve blending as a means to achieve RRAL, as mentioned in an email response from SLO rep, Ryan Mann.
- Advise the OCD District 2 office once remedial activities have been scheduled.

Thank you,

Mike Bratcher
NMOCD District 2
811 South First Street
Artesia, NM 88210
575-748-1283 Ext 108

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.
