RE: OXY * Sterling Silver 3 Federal 6 Central Tank Battery * 30-015-27638 * 2RP-4301

Sorry for the delay on this one. It and quite a few others had been misplaced. I have included a scanned copy of the signed Initial C-141 Remediation Permit along with an attached Conditions of Approval. The OCD tracking number for this event is 2RP-4301. Considering the delay OCD will accept release characterization work plans 15 days from today's date.

Please note: I was also looking in the files for this site location to see if there were any other remediations that we needed an update on and I came across case number [2RP-4261](#). Could we get an update on the status of that one? I attached above the initial C-141 that was scanned in for it.

Thank you,

Crystal Weaver
