Subject: Marathon Oil Company - 24 hour notice - Black River 15 10 State Com X 4H

Good evening,

At approximately 2:30 am, a 3rd party hauler reported an overspray from the facility. Upon immediate inspection by the Field Operator, it was found that the high pressure separator manway gasket failed. Approximately 149 barrels of produced water was released. 23 barrels of the release traveled off location and affected a 0.23 acre area. Standing fluids were immediately recovered. The well has been shut-in pending manway gasket repair on the vessel. A C141 will be submitted shortly.

We also had Surveyors onsite to survey the affected area offsite. I will share that as soon as it is received.

API – 30-015-43959

Thank you,

Callie Karrigan
