Debi,

Sorry for a late response, but you may proceed with sampling operations on your schedule.

Thank you for the notification.

Subject: [EXT] Longfellow Energy, LP - State 20B Release - Notice of Delineation Resampling - 2RP-5158

Mike,

Attached please find email correspondence from Test America and FedEx addressing the site's delineation samples that were lost during transit to the lab. We regret that we'll have to re-delineate the site. Although it's short notice, we have an opening in our field schedule and would like to resample tomorrow if approved by the NMOCD. If not, we are also available to sample on Monday, February 25th. Please let us know your preference. In terms of scope, we'll be resampling in accordance with the initial delineation plan.

We hope you understand that this delay is at no fault of our client's and we respectfully request an extension to submit delineation findings and a remediation plan to the OCD for approval.

Please let me know if we have your permission to move forward with sampling tomorrow.

Thank you,
Debi Moore

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Mike,

Even though this is short notice...we have an opening in our field schedule. Can you have permission to perform delineation sampling at the location tomorrow?

Thanks,
Debi

Subject: [EXT] Longfellow Energy, LP - State 20B Release - Form C-141 Submittal

Mr. Griswold, Mr. Bratcher, and Ms. Pruett:

Sport Environmental Services, LLC (*Sport*) has been retained by Longfellow Energy, LP (*Longfellow*) to assist with C-141 submittal, remediation and reporting associated with the State 20B release. The release occurred on November 4, 2018

and was caused by a lightning strike which in turn caused pump failure and resulted in a tank release. The released produced water was fully contained within secondary containment and all free fluids were recovered immediately following release discovery. Attached please find the **initial, signed Form C-141** associated with this release. Longfellow personnel reported the release to NMOCD District 2 at the time of discovery.

In addition, please find a **Form C-141 Supplement** which outlines additional assessment work performed inclusive of release impact mapping, geo-tagged site photographs, and groundwater depth determination documentation.

Once initial analytical results are received, a remediation work plan will be submitted to the NMOCD for approval. Advanced notification of field activities and official sampling events will be provided at least 72 hours in advance.

If you would like to discuss this matter in greater detail, please don't hesitate to contact us.

Thank you,

Cianna Logie
