DeAnn,

We have received your Workplan/Remediation Proposal for **2RP-4763 Copperhead 31 Fed Com #1H**, thank you. The borehole drilled to 50' showed no evidence of moisture or groundwater. The groundwater data and borehole log are accepted to validate groundwater is deeper than 50' in the spill area. The variance to install a 20-mil liner at 4.0' below surface in the pasture is approved.

This Workplan/Remediation proposal is approved.

Please let me know if you have any further questions.

Regards,

Robert J Hamlet

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
