## Closure

The responsible party must attach information demonstrating they have complied with all applicable closure requirements and any conditions or directives of the OCD. This demonstration should be in the form of a comprehensive report (electronic submittals in .pdf format are preferred) including a scaled site map, sampling diagrams, relevant field notes, photographs of any excavation prior to backfilling, laboratory data including chain of custody documents of final sampling, and a narrative of the remedial activities. Refer to 19.15.29.12 NMAC.

Ind regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and cencediate contamination that pose a thread to groundwater, surface water, surfac	Closure Report Attachment Checklist: Each of the following items must be included in the closure report.	
must be notified 2 days prior to liner inspection)	A scaled site and sampling diagram as described in 19.15.29.11 NMAC	
Description of remediation activities     Description activity the OCD does not relieve the responsible party of liability should their operations have failed to adequately investigate and     regulations that poses a threat to groundwater, surface water, human health, or the environment nor does not relieve the responsible party of compliance with any other federal, state, or local laws and/or regulations.
