Remediation Plan

Remediation Plan Checklist: *Each of the following items must be included in the plan.*

- ☒ Detailed description of proposed remediation technique
- ☒ Scaled sitemap with GPS coordinates showing delineation points
- ☒ Estimated volume of material to be remediated
- ☒ Closure criteria is to Table 1 specifications subject to 19.15.29.12(C)(4) NMAC
- ☒ Proposed schedule for remediation (note if remediation plan timeline is more than 90 days OCD approval is required)

Deferral Requests Only: *Each of the following items must be confirmed as part of any request for deferral of remediation.*

- ☐ Contamination must be in areas immediately under or around production equipment where remediation could cause a major facility deconstruction.
- ☐ Extents of contamination must be fully delineated.
- ☐ Contamination does not cause an imminent risk to human health, the environment, or groundwater.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

SD EA 2932 Federal Comp P11 #014H 1RP-5583. This Remediation Plan is approved with the following conditions of Approval:

- The 240' x 30' area encompassing samples HA-3, HA-6, HA-8, HA-9, HA-10 and HA-13 must be remediated according to the closure criteria for DGW<50' i.e., 600 mg/kg for Chlorides, 100 mg/kg for TPH, 50 mg/kg for BTEX and 10 mg/kg for Benzene.
- The OCD does not accept the groundwater depth value of a well that is approximately 3.1 miles from the site.
- Reclamation by 19.15.29.13 NMAC standards.
