Ms. Venegas,

Please see the responses in **red** below. I've also attached the requested additional info for the Remedy Emergency Spill Solution. If there's anything else you need, please let us know.

Thank you,

-Beaux

NRM1928237767 THISTLE 44 STATION @ FRM1928236955

All,

Can I get you to clarify the following:

- Were samples CS-11, CS-12 and CS-13 taken at the bottom of the excavation?  
**Yes**
- Are the confirmation samples five-point composite samples?  
**The stockpile soil samples (STP-1 through STP-3) are five-point composite. However, the confirmation soil samples (CS-1 through CS-18) are grab samples.**
- Did you take sidewall samples from the excavation?  
**Yes**
- Please provide more information on the "Remedy Emergency Spill Solution" and the bioremediation process.  
**Please see the attached Product Specification Sheet for the Remedy Emergency Spill Solution.**  
**The bioremediation process of the stockpiles (STP-1 through STP-3) included the application of Remedy with mixing and blending of the piles on a biweekly basis to enhance bioremediation within the stockpiles for reuse on-site.**

Thank you,

Victoria Venegas
