RE: [EXTERNAL] RE: Santa Fe Federal #8 SWD (**2RP-5138**)

Good morning Debbie,

OCD agrees with the proposed depth for the monitor well to determine the depth to groundwater at the site, thank you. Please, once the data is collected and the remediation proposal is sent, consider sending pages 3,4 and 5 of the C-141 (attached) with the plan.

Thank you,

Victoria Venegas

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Good Morning Victoria,

Thank you for the email.

We will begin by advancing the boring to 55 ft to determine if groundwater is greater than 50 feet. If water is not encountered within 55 ft of the surface, WPX will determine if the boring will be advanced until groundwater is encountered or depth of boring reaches 110 ft. Please let me know if you have any questions.

Thank you,

Debbie

RE: Santa Fe Federal #8 SWD (**2RP-5318**)

Ms. Watson,

Could you, please, provide the proposed depth for the monitor well in your Proposed Remedial Action Plan?
Thank you,

Victoria Venegas

Good Afternoon Mr. Bratcher,

Attached is the remediation proposal for the Santa Fe Federal #8 SWD (2RP-5318). If you have any questions or suggestions, please do not hesitate to contact me. Thank you.

Have a nice afternoon,

Debbie
