NRM2003849891 SKELLY QR&S BATTERY(SKELLY Q STATE #003) @ 30-025-03783

Mr. Pitt,

The OCD has approved the Remediation Plan for incident # with the following conditions of approval:

- Five-point composite confirmation samples will be collected from the floor of the excavated area representing every 200 square feet. Confirmation five-point composite soil samples will also be collected from the excavation sidewalls representing no more than 50 linear ft.
- Confirmation sidewall samples need to be 600 mg/kg or background for chlorides, even though the depth to groundwater is over 100' and the release is on-pad. This is especially important for "on-pad" releases to ensure the release did not extend to the "off-pad"/pasture area

The signed C-141 can be found in the online image data base under the incident #

Thank you,

Victoria Venegas

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
