3. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

The Osage Federal #7 has been TA'd since 5/97 with a CIBP set at 1350' capped with 20' of cement and circulated with inhibited packer fluid.

We wish to extend the TA status of the well. Attached is the chart for the successful MIT performed on 2/11/04. It previously passed an MIT on 12/18/01. We propose to continue testing the mechanical integrity every other year.

Recently an offset operator has been making some successful Yates completions in Sec. 2, directly to the south of St. Mary's leases. We need to evaluate what they are doing and determine if there is potential to return the well to beneficial use.
