If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*

A hole in collar washed out in the injection line located in the Littlefield AB Federal lease. The pump was shut down and line was isolated. Repaired line with plastic coated pipe. Replaced the Murphy switch that should have shut down the pump.

Describe Area Affected and Cleanup Action Taken.\*

The area affected was a 40' X 20' area in pasture made up of mostly sand. 0 bbls of water was recovered due to the porosity of the sand. The area was tilled and fertilizer was added for remedial purpose. Will continue to rake area and check for necessity of further action. Attached new soil analysis for review. Will continue to rake and fertilize.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
