13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Devon Energy Production Co., LP is applying with the NM OCD for approval to downhole commingle the Red Lake Queen-Grayburg-San Andres(51300) and the Northeast Red Lake-Glorieta Yeso (96836) pursuant to 19.15.5.303 (C) 3 (b) Exceptions for wells located in pre-approved pools or areas. These pools were preapproved by the OCD in order PC-1108.

The San Andres is perforated at 1912' - 2394' and the Yeso is perforated from 3013' - 3243'. Average production from the SA is 66 oil and 60 mcf. Average production from the Yeso is 69 oil and 70 mcf. The allocation method utilized is by ratio of stabilized production. For the Yeso, Oil is 51.1% and Gas is 53.8%. For the San Andres formation, oil is 49.9% and Gas is 46.2%. Commingling these two pools will not reduce the value of the total remaining production and the ownership between the two pools is identical.

14. I hereby certify that the foregoing is true and correct.

Electronic Submission #36856 verified by the BLM Well Information System
For DEVON ENERGY PRODUCTION CO LP, will be sent to the Carlsbad
