This is a follow up to the earlier notices regarding putting the Louise Yates State #2 back on production following moving the tank battery from the location of the Louise Yates State #1 located in Unit N to the location of the Louise Yates State #2 located itself in Unit K. The battery has been installed and hooked up on the #2 location and is ready for production. However, evidently because the well was down while waiting on the transfer of the tank battery, the pump stuck. We are now waiting on a pulling unit which is expected on location on the 24th of this month.
