NATURE OF RELEASE

Type of Release – Oil	Volume of Release - 25 bbls	Volume Recovered – 20 bbls
Source of Release – Flare leaked oil on location	Date and Hour of Occurrence: 5/7/2014, 6:00 PM	Date and Hour of Discovery 5/7/2014
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Geoffery Leking (NMOCD)	
By Whom? Ryan Kainer	Date and Hour 5/10/2014	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

NA

Describe Cause of Problem and Remedial Action Taken.*

Approximately 25 bbls of oil leaked from the flare onto location with approximately 20 bbls recovered. No fluids migrated off the location.

B.O. back pressure valve on heater was replaced and remediation of the spill was completed (see below).

NMOCD Reference Number 2RP-2301

Describe Area Affected and Cleanup Action Taken.*

Approximately 20 cubic yards of impacted soil surrounding the flare were excavated and stockpiled on plastic sheeting for transportation to an approved disposal facility. The excavation was backfilled with clean soil to normal grade.

Soil samples were collected from depths of 3-5' bgs using a hand auger and sent for laboratory analysis of chlorides, TPH, and BTEX. All samples returned analytical results below NMOCD Risk Ranking Action Levels. A report summarizing the findings of the subsurface assessment and requesting no further action for the site (see attached) was submitted to Mike Bratcher of the NMOCD on September 16, 2014. No further action was granted by Mr. Bratcher via email on September 18, 2014.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
