If a Watercourse was Impacted, Describe Fully.* Not Applicable		
Describe Cause of Problem and Remedial Action Taken.* A ¼" hose to the high pressure kill switch ruptured. The valve was shut and the hose was replaced.		
Describe Area Affected and Cleanup Action Taken.* The spill impacted approximately 1,525 sq. ft. of caliche well pad. The free standing fluid was recovered with a vacuum truck. The saturated soil was scraped up, placed on plastic and samples were collected. Based on laboratory analytical data and NMOCD approval the contaminated soil has been hauled to a state approved disposal facility, and the excavation backfilled with clean soil.		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
