Subject: Goldenchild 6 Battery flare notification

We are continuing to flare at our Goldenchild 6 State Battery in Eddy County, but the reason we are flaring has changed. We were originally flaring at this location, because XTO was installing a new compressor. The compressor installation was completed 2/5/2016.

1800 mcf/d
Reason for flare: DCP high line pressure
Flare discovery date: 2/8/2016 7:00 AM

We will send our flaring sundries.

Thank you,

Sherry Pack
