Describe Cause of Problem and Remedial Action Taken.*

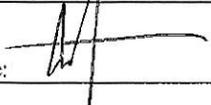

The steel coupler on the well head failed due to high pressure and vibration causing 80 bbls of produced water to leak onto the ground. A vacuum truck recovered 70 bbls of produced water and the coupler was replaced.

Describe Area Affected and Cleanup Action Taken.*

The affected area is approximately 85' x 40' on location. Remediation was completed in accordance with the remediation plan approved by Mike Bratcher of NMOCD via email on 11/25/2015 and approved by Dara Glass of the BLM via email on 12/14/2015.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
