NATURE OF RELEASE

Type of Release: Surface	Volume of Release: 10 bbl.	Volume Recovered: 10 bbl.
Source of Release: Overfilled tanker trailer	Date and Hour of Occurrence: 10/01/16 at 1700	Date and Hour of Discovery: 10/01/16 at 1700
Was Immediate Notice Given? <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom?	
By Whom?	Date and Hour	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*
N/A

Describe Cause of Problem and Remedial Action Taken.*

The driver overfilled his tanker trailer spilling approximately 10 bbl. of crude onto the caliche pad. Caliche was applied to the pad to absorb the pooled crude, and the crude impacted caliche was excavated using a backhoe.

Describe Area Affected and Cleanup Action Taken.*

A backhoe was utilized to excavate the impacted caliche pad. Two confirmation soil samples, 1@9" and 2@8", were collected from the excavated area, and one background soil sample was collected and submitted for laboratory analyses. Laboratory analytical results indicated elevated chemicals of concern (COC) in confirmation soil sample 1@9". Therefore, on October 12, 2016, additional excavation was performed. An additional confirmation soil sample, 4@18" was subsequently collected from the excavated area and submitted for laboratory analyses. COCs detected in confirmation soil samples 2@8" and 4@18" were below COC concentrations detected in the background samples. The 57.18 tons of crude impacted caliche generated were disposed of at the Lea Land landfill in Carlsbad, New Mexico on October 3 and 11, 2016.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
