

210 S. Roselawn Ave., Artesia NM 88210 575-748-9735 Fax 575-746-2825
Theresa Baize, Qualifying Broker

To the New Mexico Energy, Minerals, and Natural Resources Dept.,

We are writing to request the replacement of a dry hole marker with a sub-surface marker or ground level marker.

The well in question is identified as API# 30-015-21899 MCCA W BT #005 . It is located at 14-17S-25E, 380' FNL 940' FEL 32.841568N -104.4503174W NAD83. It just south of US 82, west of Artesia, and west of Crossbow Road.

The surface owners and their prospective purchasers of the property wish to develop the area immediately north of the plugged well. There would not be a building constructed over the well, but the current marker would impede parking and/or traffic around the back of the proposed building.

For further information or any questions, please contact:
