13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

1. Talon/LPE was retained by Legacy Reserves to address the BLM closure requirements at the Midnight Matador #10 P&A location. Composite soil samples were taken from the location prior to excavation. The soil samples were tested for chlorides using the field titration method and samples were sent for analysis to Cardinal Laboratories. These analyticals were sent to the BLM.

2. The impacted areas from the drilling pit and at wellhead on the location were subsequently excavated to a depth of 3-4 feet deep as directed by the BLM. The excavated soil was transported to an approved NMOC disposal facility. The excavation was left opened until closure approval was granted by the BLM after acceptable sampling results were obtained.

3. The entire location was also scraped of all chloride stains and the impacted soil was transported to a disposal facility per the BLM.

4. The excavated areas were backfilled and contoured to match the surrounding terrain.

5. Erosion control berms and wind rows were installed around the location to prevent storm waters from running across location as directed by BLM.

6. The location will be seeded using the recommended BLM seed mixture for the area.
