13. Describe Proposed or Completed Operation. Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

This Sundry is being submitted to provide an update Pioneer Rig 33 BOP and choke manifold equipment. Upon recent rig inspection by Legion Brumley, BLM, it was noted that the line between the HCR valve and choke manifold is a flexline hose with a maximum test pressure of 10M / 5M working pressure instead of a fixed straight steel line of 5M working pressure. This flexline was tested to 3M per BLM COA on rig up of the 9-5/8" casing.
