13. Describe Proposed or Completed Operation. Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Fasken Oil and Ranch, Ltd. respectfully requests to revise the interim reclamation of the well pad and layout of the facilities for the Shell Federal No. 2 location. If the location is set up as it is currently drawn out there could be a risks of the battery or well head being hit by trucks as they come in and out of the location due to the location of the access road into the location. If the battery is moved to the eastern side of the location this will make it easier for trucks and workover rigs to access the location. This is a small location and it will be even smaller after the reclamation process is completed.

Please see attached drawing with the new layout for the facilities.
