13 Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Attempted a MIT test on 2/4/12 with Bob and Gerard present. Casing and tubing kept communicating together while tubing test. Could not complete test, pulled packer out of hole and found rubber was torn. Going to try and get another rig, need at least 60 days to locate a rig to complete test. Well is shut in till completion of test.

14 I hereby certify that the foregoing is true and correct
