13. Describe Proposed or Completed Operation. Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

6/8/2012 - request approval to reposition Pioneer 33 rig so the V-door will be on the south side of the drilling location. Previously submitted the position would be on the east side. Attached is the closed loop location platt originally submitted.

For safety purposes, this will allow all equipment, e.g., forklifts, to stay off the blacktop access road. No other changes to the site will be required, e.g., reclamation area, stock pile, surface damage requirements, etc.
