RECEIVED

MAR 2 2 2005

OCD-ARTESIA

Describe Cause of Problem and Remedial Action Taken. (Attach Additional Sheets if Necessary)

Flowline leak, small hole in bottom of pipe probably external corrosion from laying on wet soil. Shut in well and isolated line, called vac truck when arrived vacumed up standing fluid and disposed of at the Indian Hills SWD. The bad section of line will be replaced and put up on blocks to prevent contact with the ground.

Describe Area Affected and Cleanup Action Taken. (Attach Additional Sheets if Necessary)

Low lying area east of the facility production header, grazing land, area had just dried up prior to storm the day before which left some standing water in area. Vacumed up all standing fluid.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulation all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a thread to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
