Describe Cause of Problem and Remedial Action Taken.*

Broken Flowline caused a release to flow into pasture. Well was shut in and repairs made. Vacuum truck was dispatched to control incident.

Describe Area Affected and Cleanup Action Taken.*

An approximate size of 8' x 40' was impacted. The impacted area is located South of the well on the edge of the well pad. Soil from the pooling areas was excavated and placed in plastic and will be disposed of at an NMOCD approved facility. Vertical and horizontal delineation samples will be taken and analysis run for TPH and BTEX once all contaminated material has been removed. **Depth to Ground Water: >50' (approx. 95', per New Mexico State Engineers Office); Wellhead Protection Area: No; Distance to Surface Water Body: >1000'; SITE RANKING IS 10.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability - should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
