Subject: RE: RDX-15 #5

Sorry that this has taken so long Karen. The "tops" data that I received from our Geology Dept. is as follows:

Rustler @ 651 feet
Salado @ 1003 feet
Base lime @ 3547 feet
Delaware @ 3573 feet
Cherry Canyon @ 4668 feet
Brushy Canyon @ 5739 feet
Bone Spring : did not penetrate

I hope this will clear things up on the well. Let me know please if I need to modify any reports, etc.

Thanks,

Thanks,

Charles K. Ahn
