NATURE OF RELEASE

Type of Release Oil and produced water	Volume of Release 5BO, 5BW	Volume Recovered 0
Source of Release	Date and Hour of Occurrence	Date and Hour of Discovery
Was Immediate Notice Given? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Not Required	If YRS, To Whom? Reported By Mike Bratcher, Artesia OCD	
By Whom?	Date and Hour	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

Packing leak on triplex pump caused nbclow grad tank to overflow onto ground inside berm area, and overspray from flare stack spilled oil on ground.

Describe Area Affected and Cleanup Action Taken.*

Area as stated above, the flare stack was removed, and soil was picked up, the belowgrade tank was registered on C-144, emptied and tested, the inside of the berm area was cleaned of contaminated soil, and will be tested and brought to OCD standards.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCED rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCED marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCED acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
