NOTICE OF VIOLATION - Imspection

Dear Operator:

The following inspection(s) indicate that the well, equipment, location or operational status of the well(s) failed to meet standards of the New Mexico Oil Conservation Division as described in the detail section below. To comply with standards imposed by Rules and Regulations of the Division, corrective action must be taken immediately and the situation brought into compliance. The detail section indicates preliminary findings and/or probable nature of the violation. This determination is based on an inspection of your well or facility by an inspector employed by the Oil Conservation Division on the date(s) indicated.

Please notify the proper district office of the Division, in writing, of the date corrective actions are scheduled to be made so that arrangements can be made to reinspect the well and/or facility.

Violations
Surface Leaks/Spills

Comments on Inspection:

There are 4 flowlines that run East and West to a tank battery located West of this well. There are

at least 4 produced fluid release sites along these lines. The largest and probably most current is located approx 100 yards West of well. Surface area impacted is approx 150'x50' and is considered a reportable release. Wellhead area also has contamination. These sites are in violation of Rule 13 and Rule 116. Delineation and remediation of contaminants required. Please submit a C-141 along with remediation plans and site ranking information. Pasture is currently being used to graze cattle.

Violations

Surface Leaks/Spills

Comments on Inspection:

Footages are incorrectly listed on well sign. Tank battery for this well is in unit letter I. Several areas of contamination at battery. Below grade tank may be leaking. Gas line is plumbed utilizing a KimRay valve with the pop off line terminating open ended in the battery. Produced fluids contamination at end of line. Battery area is in violation of Rule 13 and Rule 116. Delineation and remediation of contaminants required. Please submit C-141 and remediation workplan along with site ranking information.

Emergency/Temporary Pits

Comments on Inspection:

Well is producing. Drilling pit open, NE portion of liner is breached (melted) below content level. Inner horseshoe has oil layer on fluids entire portion of pit. Oil must be removed immediately.

Violation Rule 50.

In the event that a satisfactory response is not received to this letter of direction by the "Corrective Action Due By:" date shown above, further enforcement will occur. Such enforcement may include this office applying to the Division for an order summoning you to a hearing before a Divison Examiner in Santa Fe to show cause why you should not be ordered to permanently plug and abandon this well. Such a hearing may result im imposition of CIVIL PENALTIES for your violation of OCD rules.

Sincerely

Artesia OCD District Office
