RECEIVED

MAY 31 2005
OCD-ARTESIA

If a Watercourse was Impacted, Describe Fully.*

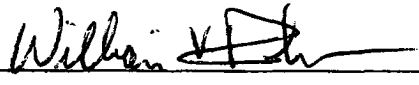

Describe Cause of Problem and Remedial Action Taken.*

Operator notified of the need for remedial action around the tank battery site. Operator removed contaminated soil located at site and replaced soil with fresh topsoil. Leveled location and returned to production.

Describe Area Affected and Cleanup Action Taken.*

Area affected was approximately 10' by 15' and consisted of spillage from a previous tank set on location. Clean up consisted of the method described above.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Operator,

The NMOCD District 2 office is in receipt of a Final Report C-141 submitted for a remediation project at the above referenced well site and is approved. Upon inspection of the site, it was noticed that the tank battery area is utilizing a KimRay valve with the blow down line plumbed to release into the pasture area. Please correct this by providing some type of containment should fluids be released through this valve.

Thank you for your cooperation and attention to this matter.

Mike Bratcher
