**Comments on Inspection:**

Tank battery, east of well, has produced water tank plumbed to overflow into pasture without any visible means on control. Gun barrel has piping that appears to be used to blow down tank bottoms onto location.

There is significant contamination on south side of tank battery, impacting pasture over area approximately 60 feet by 40 feet. Natural water collection depression in this area has cattle tracks through the impacted area.

Contact NMOCD District 2 Environmental Compliance Officer with site ranking and remediation work plan.

Notify NMOCD District 2 Office 48 hours prior to any remediation work or taking samples where results that may be submitted to OCD.
