SUMMARY OF CHANGES:

- **a.** Based off historic wells drilled in the area, the surface casing has been changed from 9.625" to 8.625". The new casing characteristics can be found below. The surface hole size has also been adjusted from 12.25" to 11". In an effort to save costs, the conductor will be set at 80' instead of 120'.
- **b.** Due to the casing and hole size change, the cement volumes have also been adjusted. This will allow us to cut down on the excess cement having to be hauled off and exposed of.

CASING PROGRAM:

Surface Casing: 8.625'	$^{\prime}$ casing set at \pm 450 $^{\prime}$ MD	/ 450' TVD in a 11" ho	le filled with 10 ppg mud

Interval	Length	Wt	Gr	Condition	Cplg	Coll Rating (psi)	Burst Rating . (psi)	Jt Str (M-lbs)	ID (in)	Drift (in)	SF Coll	SF Burs t	SF Ten
