Describe Cause of Problem and Remedial Action Taken.*
While making daily rounds, pumper discovered hole in fire tube of heater treater. An estimated 30 bbls of oil and water mix (approx 25 BW + 5 BO) was released. All fluid released was contained within the dike. Vacuumed up all fluid possible and dispose of at an approved disposal facility. Repair heater treater. Will dig out contaminated soil, dispose of at Lea Land and replace with clean soil from a nearby source. Soil samples will be taken for analysis.

Describe Area Affected and Cleanup Action Taken.*

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
