NATURE OF RELEASE

Type of Release	Produced Water	Volume of Release	716 bbls	Volume Recovered	0 bbls
Source of Release	Supply Line	Date and Hour of Occurrence	5/20/13	Date and Hour of Discovery	5/20/13
Was Immediate Notice Given?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom?			
By Whom?	Date and Hour				
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

A break in the supply line lead to a release of 20 bbls of produced water, which covered 3,621 sq ft of pasture land. The site was sampled in 5 places throughout the release and representative samples were taken to a commercial laboratory for analysis. A soil bore was installed at the site on August 9th, 2013. The soil bore showed elevated chloride levels at 20 ft bgs, which decreased to below 250 mg/kg at 40 ft bgs.

Describe Area Affected and Cleanup Action Taken.*

A Corrective Action Plan will be developed to remediate the area based on initial sampling data.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
