A flange on the 10" mainline developed a leak due to loose flange bolts, the bolts were re-torqued and the line was pressure tested.

Describe Area Affected and Cleanup Action Taken.\*  
Approximately 240 sq.ft. of pasture was affected by the release, all of the fluid soaked into the ground. The area around the leak point was excavated and stockpiled on-site pending removal. The remediation will be in accordance to the NMOCD and BLM guidelines.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
