Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	
If a Watercourse was Impacted, Describe Fully.*		
Describe Cause of Problem and Remedial Action Taken.* There was a backhoe operator on location cleaning up oily stained spots within the tank battery with a handheld, spade shovel. He was removing some stained soil underneath the load line valve of oil tank #2. When he removed the shovelful of contaminated soil, the rusted tank bottom gave way at the very front of the tank. This tank has been taken out of service and washed out.		
Describe Area Affected and Cleanup Action Taken.* An area of 80' x 12' of the plastic lined, earthen berm containment was affected by the oil release. The contaminated gravel within this containment will be removed and replaced with fresh gravel.		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
