Greg – if you cut/paste then send this message, we can move forward with Mike Bratcher. Thanks

Mike – Murchison withdraws the C-144 applications for the wells listed below. We intend to re-submit the applications under a new Pit Rule, assuming the new Rule is in effect by May/June. If our drilling schedule necessitates a submission prior to the effective date of the new Rule, we hope that you can move expeditiously to review/approve the application. In anticipation of a change in the drilling schedule, we are submitting a new pit design for War Horse 1H to BLM to make certain that the BLM COAs are consistent with our new pit design. Thanks for your work.
