Describe Area Affected and Cleanup Action Taken.*
The area affected was approximately 70'x70' on the NE side of the facility near the pump jack. 15 bbls of spilled fluid were recovered by vac truck services the same day of the incident. After a representative from the Bureau of Land Management (BLM) analyzes the effects of the spill the affected soil will be removed and replaced. Talon LPE will complete soil sampling if deemed necessary by the BLM.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
