13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

The Gissler B 14 has a braden head water flow that needs to be fixed. A CBL has been run and TOC is not clear, something appears to be behind the production string at the surface but only for a few hundred feet.

While trying to test casing, a casing leak was found in the surface casing. The surface casing needs to be dug out until good pipe is found and new surface casing can be installed from that point up. After good pipe is found, check annulus for cement between surface and production casing. The new casing will be 8 5/8" 24# LT&C J55 casing with 1.125 CDF, 1.00 BDF and 1.80 TDF.
