Describe Cause of Problem and Remedial Action Taken.* Site glass on separator failed when well pressured up causing oil mist to be sprayed out in the pasture to the Northeast. Separator was isolated to make repairs.		
Describe Area Affected and Cleanup Action Taken.* Affected area- Overspray out into the pasture 300 ft by 100 ft Northeast of the separation equipment. Vegetation was sprayed with Micro Blaze (3% cut).		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
