If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*  
A gasket failure on a heater treater caused the release. This release occurred within a lined facility, however an overspray of 20' x 40' impacted the pasture to the south. No standing pools formed as a result of the spray. Vacuum trucks were dispatched to pick up all standing fluid in berm and dispose of at an NMOCD approved facility.

Describe Area Affected and Cleanup Action Taken.\*  
Once all standing fluid was retrieved an pressure washer cleaned equipment and removed gravel. The pasture was treated with soapy water on vegetation and Microblaze on the soil.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
