Describe Cause of Problem and Remedial Action Taken.* **On September 23, 2014 a valve was opened by livestock causing the release of 66 barrels of produced water. No fluids were recovered due to flooding. The flow path subsequently ran southeast across the location. The area affected ran south of the load-outs approximately 243-feet long and 8 to 10-foot wide. The flow path left the location to the south into the pasture approximately 75-feet long by 25-feet wide. Talon/LPE was contracted to perform an initial site assessment and soil sampling to generate a work plan.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
