A break in the heater line caused the release. Vacuum truck(s) and roustabout crew were called.

Describe Area Affected and Cleanup Action Taken.\*

An approximate area of 10' X 10' within the bermed and lined battery. The heater line was repaired and 100% of the released fluids were recovered using a vacuum truck. Depth to Ground Water: >100' (approximately 325', per ChevronTexaco Trend Map), Wellhead Protection Area: No, Distance to Surface Water Body: >1000', SITE RANKING IS 0. Based on the battery is lined/bermed and all released fluids recovered, Yates Petroleum Corporation requests closure.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
