Tank overflowed because power failure to transfer pump and access was unattainable from rains and flooding to reactivate pump or have produced water hauled off; vacuum truck(s) called.

An approximate area of 60' X 25' (inside bermed and lined battery). All released produced water was recovered. Depth to Ground Water: <25' (25', ChevronTexaco Trend Map), Wellhead Protection Area: No, Distance to Surface Water Body: > 1000', SITE RANKING IS 20. Based on all released produced water recovered and battery is lined and liner intact, Yates Petroleum Corporation requests closure.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
