If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

A water dump valve failed sending all of the water to the oil tank causing it to overflow. The dump valve was replaced.

Describe Area Affected and Cleanup Action Taken.*

The spill impacted the entire surface of the dirt containment area of approximately 1500 sq. ft. the containment area is constructed with compacted caliche covered with pea gravel. All of the free standing fluid was recovered, due to the very hard coarse soil conditions the soil inside the containment, the impacted area is heavily saturated with produced water. Basin Environmental placed a one-call for the purpose of determining the vertical extent of contamination inside the bermed area. A summary report and remediation plan will be submitted after the sampling event scheduled for 12/1/14.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
