If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

The production tank overflowed, causing the release. Vacuum truck(s) were called.

Describe Area Affected and Cleanup Action Taken.*

An approximate area of 60' X 120' within the lined/bermed battery. The valves were closed and the spill was recovered using a vacuum truck. Impacted soils excavated /hauled to a NMOCD approved facility. Depth to Ground Water: < 25' (approximately 25', per ChevronTexaco Trend Map), Wellhead Protection Area: No, Distance to Surface Water Body: >1000', SITE RANKING IS 20. Based on the battery being lined/bermed and all released crude oil recovered, Yates Petroleum Corporation requests closure.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
