Describe Cause of Problem and Remedial Action Taken.* drilling rig near the West B 33 called LINN to report a leak-Bobby Sooter was contacted and he responded along with Eddie Jaramillo and Rick Rickman. It appeared that the well had been hit by a truck as dual wheel marks were at the well head. The damage results were the tubing valve and tubing below being broken off at the top of the well head and fluid was back flowing on to location Describe Area Affected and Cleanup Action Taken.* estimated 40 bbls. Of fluid picked up in adjacent pasture and estimate of 30 bbls from location, equipment near location was used to dike well pad and contain fluid along with a vacuum truck tied to the well head. Delineation to be done contact made

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
