13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

As noted in our POD, XTO Energy will be fracing the following BLM wells over the next 12 months: Nash Unit #43H, #44H, #45H, #55H, & #60H. Fresh water will be used on these fracs. This Fresh Water will be transferred from our Frac Pond (State Land: Survey attached) over to the individual frac locatons. A 10" layflat hose with a pressure rating of 200 psi (600 psi burst) will be used to tranfer the water at around 100 psi. The "temporary" lines will run across BLM surface. The water transfer should last no more than 6 days. At that point the lines will be removed until time to frac the next well. Frac frequency will be occur every 50 days.

A map is attached showing the well, pond, and temporary transfer line location.
