13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Based on the attached successful MIT chart, LINN respectfully requests a one year extension of the current TA status. A reservoir study has been conducted to determine and quantify remaining potential in the area. At this time, the most promising project is an extension of the existing Seven Rivers Flood in the area of the subject well. LINN is working towards submitting a C-108 application for injection conversions and/or new injector drilling within the next twelve months.
